

Genetically Modified Organisms (GMO's) Policy

The Chilli Doctor Ltd. understands that, for many of our customers, the presence of GMO's and/or derivatives in our products is unacceptable.

The Chilli Doctor, therefore, only sources products which do not contain GMO's and/or their derivatives. This requirement is clearly stated on our specifications and terms and conditions documents.

In countries of origin where GM ingredients are commercially available alongside their conventional counterparts, evidence will be sought from the supplier to demonstrate that our product(s) do not contain GMO's and/or derivatives.
