

tCD Environmental Policy

The Chilli Doctor aims to reduce the detrimental environmental impact of its activities to a practicable minimum.

In particular we:

- Encourage suppliers to develop and maintain proactive environmental management systems.
- Provide support for suppliers' initiatives to reduce the effects of their activities on the environment to a practicable minimum and strive for continual improvement in their environmental performance.
- Promote the use of recycled packaging and recycling of waste where possible.
- Assess the environmental impact of any new development by product, process or project.
- Ensure the storage and disposal of waste is undertaken in a safe and secure manner.
